CREATE

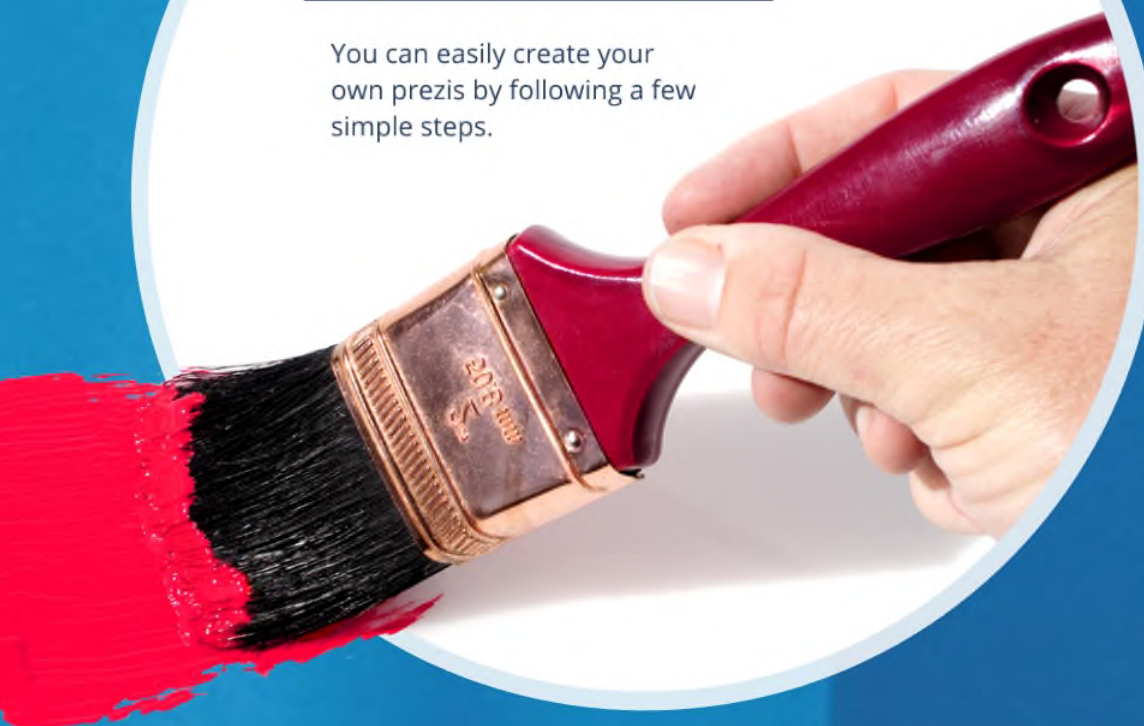
You can easily create your own prezis by following a few simple steps.



Pick a template

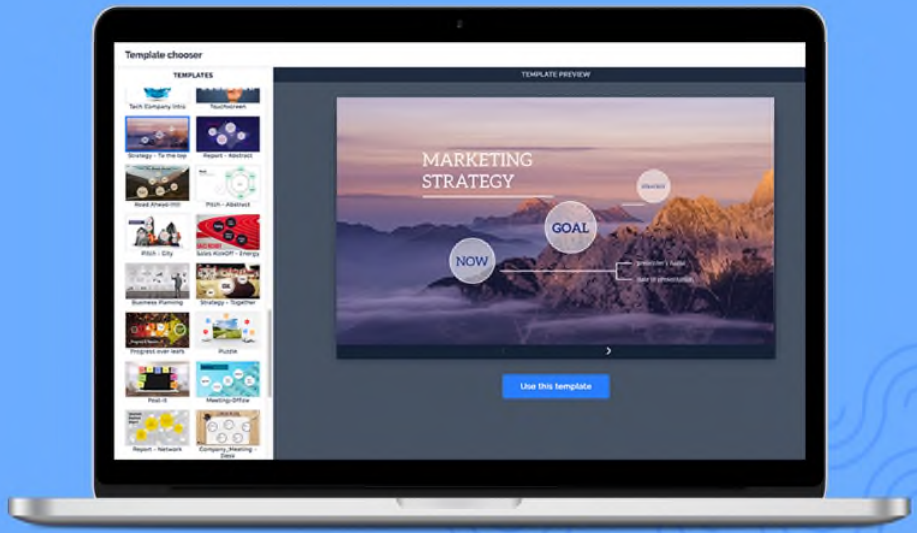
Customize

Layout

Add content

Pick a template

No need to create from scratch.
Choose one of our customizable
designer templates to get started fast.

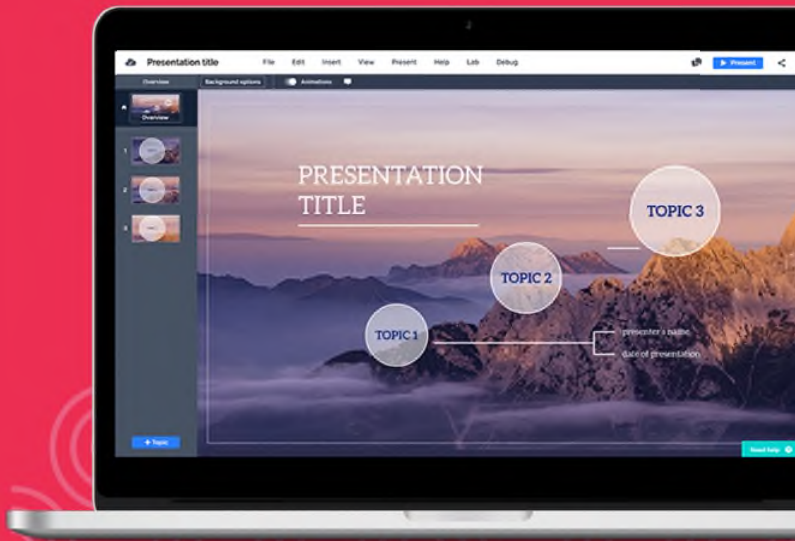


Customize

Change your theme options to customize your prezi. You can choose a predesigned theme, change the background color, or add a background image.

Lay out your topics

Topics help organize the information you want to present. Use them to structure your presentation into meaningful sections to tell your story.



Add content

Topics can also include subtopics that are revealed when you enter a topic so your content remains hidden until you're ready to show it. You can fill subtopics with text, images, video, and more.

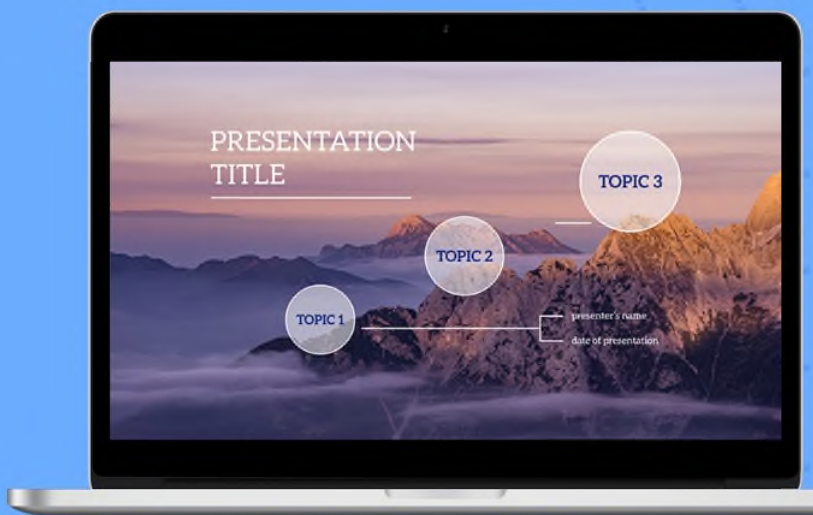
PRESENT

PRESENT
Here are just a few of the ways Prezi makes you a dynamic and engaging presenter.
Conversational presenting
Presenter view
Go mobile

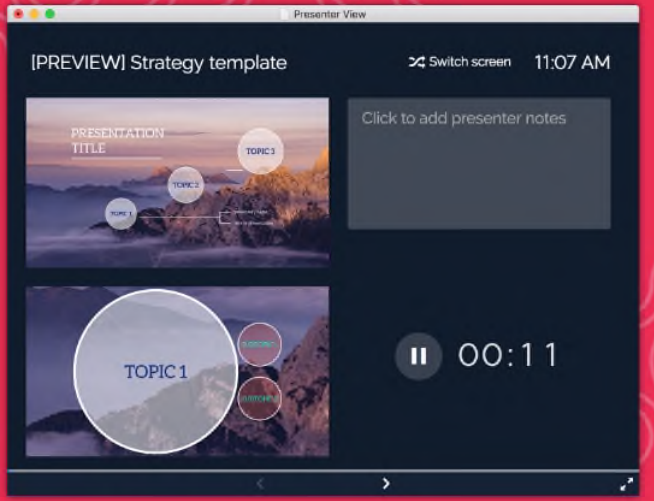
Conversational Presenting

Don't flip through 50 slides. In Prezi, it's easy to jump around and reach content relevant for your audience so you can keep your conversation going with the focus on you and your story.



Presenter view

Leave yourself presentation cues and verbal prompts only you can see while presenting. Use the timer function to stay always on-pace.



Go mobile

Our mobile apps let you present to anyone anywhere, whenever opportunity strikes.

Share

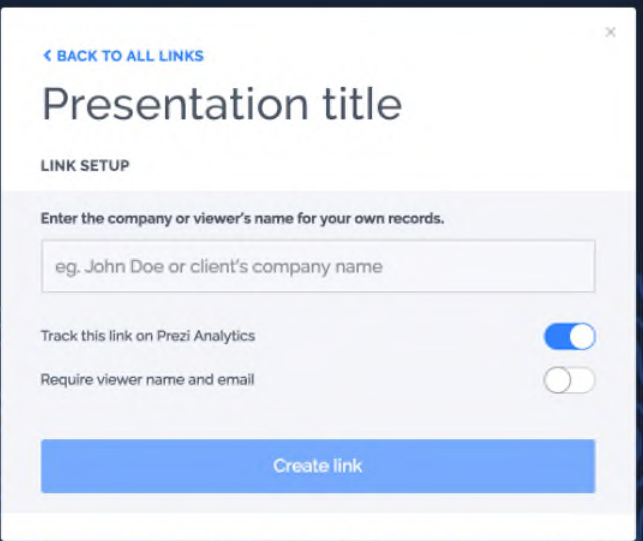
Once you make a prezi, spread the word. Prezi gives you a few different ways to share your prezi.

Send out a link

Analyze engagement

Send out a link

The easiest way to share your prezi is to send its view link. Anyone with this link can view it but not edit it.



Analyze engagement

Never wonder again if a client has viewed your prezi. With Prezi Analytics, you can get stats including how many times a prezi has been viewed and for how long. Follow up to get real-time numbers.
